DEEP SPACE PROJECT

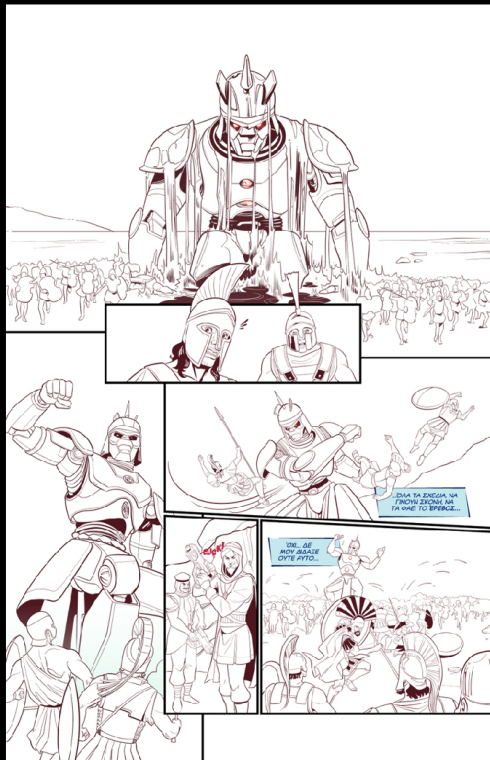

A digital illustration of a night desert landscape. The sky is dark blue and black, filled with numerous white stars and a prominent, bright full moon in the upper left. The Milky Way galaxy is visible as a faint, glowing band of stars across the sky. In the foreground, there is a body of water reflecting the moon and stars. To the left, there are several stone columns and a partial archway, suggesting ancient ruins. To the right, a large, reddish-brown pyramid stands prominently. The background features rolling sand dunes and dark, silhouetted mountains under the starry night sky.
